RE: Investigation of Kentucky Utilities Company's and Louisville Gas and Electric Company's Respective Need for and Cost of Multiphase Landfills at the Trimble County and Ghent Generating Stations
Case No. 2015-00194

Dear Mr. DeRouen:

I am writing to offer a brief comment on the July 30, 2015 Intra-Agency Memorandum filed in the record in this case regarding the informal conference held on July 29, 2015. The sixth paragraph of the informal conference memorandum states:

Mr. Walters asked the Companies whether there were different options to move the CCR without dewatering the materials. Mr. Straight and Mr. Voyles described the wet and dry processes the Companies use in disposing and storing CCR, and emphasized that a CCR treatment facility is fundamental to the disposal and storage of CCR at Trimble County.

When answering this question at the informal conference, Mr. Straight and Mr. Voyles emphasized that a CCR treatment facility is fundamental to the disposal and storage of CCR at Trimble County *or any other location*.

Please note that the map of the Warsaw site Mr. Voyles distributed at the informal conference and which is attached to the informal conference memorandum appears to be illegible. The map was downloaded from Google Maps. I am submitting a legible version document in a PDF file with this letter.
